

Boiler Compliance Made Simple

Strengthening Boiler Safety and Compliance for a Leading Industrial Equipment Rental Provider

Site-specific SOPs and onsite training to strengthen boiler safety, compliance and operator competency.

The Challenge

- Newly commissioned boilers required clear, documented operating procedures.
- Site personnel required formal training to safely operate and maintain the equipment.
- Daily and weekly inspections, shutdown and blowdown procedures needed to be standardised.
- Compliance with AS 2593 needed to be addressed to minimise operational and safety risks.

The Solution

- Comprehensive review of site-specific boiler operations and requirements.
- Development of tailored Standard Operating Procedures (SOPs) covering boiler operation, inspections, shutdown and blowdown.
- Collaboration with site personnel and O'Brien boiler specialists.
- Documentation aligned with AS 2593 and relevant manufacturer requirements.
- Delivery of one-day onsite Unattended Boiler Operator Training.

The Result

- Clear, site-specific operating procedures established.
- Personnel trained in safe boiler operation in accordance with AS 2593.
- Reduced compliance risk and improved audit readiness.
- Greater confidence in day-to-day boiler operations.
- Improved operational safety through clearly defined procedures and responsibilities.

The O'Brien Difference

O'Brien delivered more than standard training. By combining technical expertise, tailored operating procedures and practical operator training, we provided an integrated solution designed around the client's operational requirements.

Value Delivered

- ✓ Improved Compliance
- ✓ Safer Boiler Operations
- ✓ Site-Specific SOPs
- ✓ Trained and Competent Operators
- ✓ Greater Audit Readiness
- ✓ Operational Reliability

Why O'Brien?

- ✓ Tailored, site-specific solutions
- ✓ Australian Standards expertise
- ✓ Practical, hands-on training
- ✓ Integrated documentation and operator training
- ✓ Technical boiler expertise

O'Brien Training | RTO 45484

Building Capability. Strengthening Compliance.

Practical, industry-led training supporting safer operations, workforce competency and compliance with Australian Standards.
